Speak with your Ricoh Channel Account Manager to learn more.

Ricoh's leading edge technology with low cost-per-page factors helps law offices minimize costs, maximize profitability.

Does your office track the copies and prints made on behalf of wealthy retainer or corporate clients? Are you a contingency lawyer who doesn't get paid unless your client wins or settles? Do you make multiple sets of depositions for distribution to all interested parties in a lawsuit? In any case, you have a vested interest in keeping costs to a minimum without

sacrificing the image quality required to attract and keep clients. Producing legal briefs and court documents is only half the battle – the output side. Often, the initiation of any legal action is accompanied by an avalanche of evidentiary materials that must be organized and examined by staff to determine viability and relativity to the issue at hand. There are disclosure issues that must be balanced against attorney-client privilege rights, so security is always a concern.

Ricoh understands these issues and offers a scalable product line with the image quality, document management, and security features you need to deliver outstanding service to every client – with the lowest possible total cost of ownership so you can maximize your firm's profitability under any business model. Plus, every Ricoh solution includes a **One Year Warranty**, a

U.S.-based Help Desk with 24x7 toll-free service and support, plus a **national network of Ricoh trained sales and technical personnel** to ensure you are focused on your clients' legal needs, not printing. Maximize your technology budget with these inherent advantages of Ricoh solutions:

- **Secure Print and Locked Print** features of all Ricoh drivers ensure privacy for materials ranging from merger and acquisition papers to divorce proceedings.
- **Genuine Adobe® PostScript® 3™** is available on most of our laser printers and provides outstanding image quality to present details of crime or accident scenes in jury handouts.
- Access to **high-speed monochrome and full-color scanning** with time and date stamping capabilities easily tracks the input of all discovery materials.
- **Cost-free electronic document distribution** speeds communications with other legal consultants and adversaries for full compliance with disclosure laws.
- **Wireless connectivity options with WPA (Wi-Fi Protect Access) support** permits lawyers to conduct interviews or complete discovery documents and then print them securely from anywhere in the office.

A sampling of Ricoh office solutions designed to satisfy the needs of law firms and legal departments of every size is listed below.
