

Webroot® SecureAnywhere™ 2012

Revolutionary new products take security to the cloud.

And deliver the fastest, least disruptive protection your customers can buy.

Webroot's SecureAnywhere approach offers fast and light protection for PCs, laptops, tablets, and smartphones. And because it's in the cloud, it uses less system resources and is always up to date. SecureAnywhere products work so silently you hardly notice they're working. But they are. More effectively than any security product you've ever experienced.

Why Recommend Webroot SecureAnywhere?

- Its cloud-based subscription model means security is always current without having to download updates
- It's fast and light — scanning in just two minutes—so you can work and play without disruptions
- It doesn't conflict with other apps and can be used as added protection with other security software
- It's easy to manage all your devices from anywhere in a convenient online portal

**Scans nearly 4x faster
than Norton™***

*PassMark Software, "Webroot SecureAnywhere vs. Traditional Anti-virus, August 2011"

"WOW!!! This has to be one of the quickest and smartest anti-virus and malware software out there."

—TIJANA H.

"I had nasty viruses on my laptop and nothing would remove them."

Webroot took less than 5 minutes to scan my laptop and remove all of the viruses I had on my laptop. Thanks Webroot, you ROCK!"

—DAWIT
